

Your **Trusted** Advisor in Secure Solutions

At G4S, our goal is to be your Trusted Advisor when it comes to securing your world - your people, your property and your assets. We believe that the most effective way to secure that which is most important to you is through an Integrated Services approach that includes a combination of Security Personnel, Technology Solutions and Corporate Risk Services - all working in harmony.

We would like to take this opportunity to briefly introduce you to the complete line of services that we can offer to address your most

pressing pain points and provide peace-of-mind, knowing that your most prized assets are secure.

The strength of our solutions is first and foremost in our people, but can also be found through our best-in-class process and technology solutions. While not every security need requires a multi-faceted solution, we are poised to best understand the security industry and the approach that makes the most sense.

Listed below are many of the services that we offer across all three business platforms.

Here's where G4S truly delivers on its promise of service excellence:

MANNED SECURITY SERVICES

Manned Security is about much more than putting a guard on post. Beyond the traditional security guard, G4S offers various levels of security personnel who are selected and trained to exceed security requirements. From our plain clothes loss prevention team, to our uniformed tactical guards (a.k.a. Elite Protection Professionals), we understand the importance of creating the right program, with the right people to fit your business.

SECURE INTEGRATION (TECHNOLOGY) SOLUTIONS

Perhaps as a stand alone solution or in combination with our manned guards, technology solutions are proven effective and reliable. Whether looking for access control solutions to ensure that entry to your business is limited to only the individuals you specify, or remote video monitoring to help safeguard your property when you can't be there, our solutions are customizable and affordable.

Our expert team can help you assess which technology will work for your environment, whether it be Bluetooth card or phone readers, touchless door entry, or a visitor identity management system. Our ultimate goal is always on finding a security solution that delivers on its promise.

CORPORATE RISK SERVICES

Business risks are an unavoidable reality. We work with customers to create and implement strategies focused on reducing risk, increasing revenue and expanding profitability. G4S provides access to unparalleled industry knowledge backed by customized business models and extensive resources. With a network of high-level security personnel right across the globe, we have access to some of the most high level risk reporting and capabilities in the Canadian market today.

We look forward to developing a partnership with you as your Trusted Advisor. We invite conversations about how to leverage and maximize your security program at any time.

Your G4S Connection:

**YOU DRIVE THE CONVERSATION.
WE LISTEN AND ACT.**
